# ***Coding of My SQL:-***

## **Creating Table Publisher :-**

Create table publisher

```
(pub_int int(4) Primary key not null,  
pub_name varchar(30) not null,  
pub_phone1 varchar(40),  
pub_phone2 varchar(40),  
status char(1));
```

## **Creating Lib :-**

Create table lib

```
(acc_no int(4) primary key,  
acq_no int(4),  
author1 varchar(30),  
author2 varchar(30),  
pub_id int(4),  
price float(7),  
pdate date,  
pages int(4),  
edition int(4),  
  
Foreign Key (pub_id) References  
publisher(pub_id),  
status char(1));
```

## **Creating Table Member :-**

Create table member

```
(memb_no int(4) Primary Key,  
memb_name varchar(30),  
memb_add varchar(40),  
mdate date,  
medate date,  
mfee double(8,2),  
mem_status char(1),  
mem_issue char(1));
```

## **Creating Table Missue :-**

Create table Missue

```
(acc_no int(4),  
acq_no int(4),  
memb_no int(4),  
idate date,  
rdate date);
```

## **Creating Table Tissue :-**

Create table Tissue

```
(acc_no int(4),  
acq_no int(4),  
memb_no int(4),  
idate date,rdate date);
```

# ***Coding of JAVA:-***

## **ABListUI:-**

```
